We started [gombaforum.hu](http://gombaforum.hu) in 2007, when lots of journals on local mushroom growing and mushroom industry were ceased in Hungary. Our aim was to create a webpage which provides information to mushroom growers in the Central European area. We try to list as many companies and collect as much specialized bibliography and current news as we can, besides, readers interested in mushroom growing can take advantage of our free consultation.

## Page views, visitors

In 2021 the page had 4.000 visitors per month on average which meant 7.000 page views. 35% of the visitors are Hungarian readers, 35% of them are reaching the site from the Central European countries. The rate of visitors from Romania is about 30%.

## Social media activity

With our [Facebook page](#), Facebook [group members](#) and Instagram [followers](#) we can reach **more than 5.500 readers** who interested in mushroom growing.
